## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-58 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record does not teach or render obvious the claimed method or apparatus for displaying an image, according to independent claims 1 and 20, comprising the production of a polarization inversion pattern in a ferroelectric member to produce an image contrast in a contrast production member by an influence of the surface charge pattern. The prior art does not teach or render obvious an image display medium, according to independent claim 39, comprising a ferroelectric member in which a polarization inversion pattern is produced and a contrast production member which is joined to the ferroelectric member. In addition, applicant's arguments, filed 9/1/05, are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
